

INKLING CONNECT

Streamline The User Experience

Using different tools requires bouncing between applications, constantly logging in and out, and moving data. Improve the user experience by allowing users to access several tools in one application with only one login.

More Engaging Content

With Connect, in addition to modern content created in Inkling, you can easily leverage partner micro apps, augmented & virtual reality, and partner widgets embedded right into your learning and knowledge content.

Better Data

When applications are disparate and siloed, there is a good chance you're re-entering data in several places and increasing the chance of errors. Minimize risk and simplify data consistency with automatic data transfers.

INKLING CONNECT KEY FEATURES:

Connect To LMS & LXP Systems

Ensure a seamless learner experience by integrating Inkling with most LMS & LXP providers through standard connectors and a flexible integration-as-a-service platform.

Connect To Third-party Content

Gain access to tens of thousands of standard third party learning courses including courses curated specifically for key verticals. Import these modern, off-the-shelf, e-learning courses directly into Inkling's Learning Pathways to compliment your custom, mission-critical content.

Data Connector

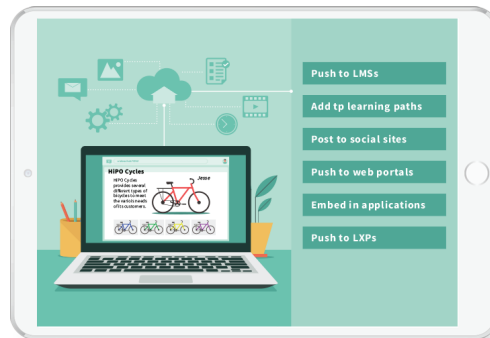

User data is exported out of Inkling and imported into your own business intelligence tools and learning record stores for deeper insights.

[xAPI]

Get deeper insights with more granular learning data including time spent in content, Send real-time data from Inkling directly to your existing LMS or LRS that is xAPI compliant.

Micro Apps

Extend the functionality & power of Inkling by leveraging partner micro apps for games, virtual reality, widgets and extended enterprise designed to work seamlessly inside the Inkling platform.

WHO WE HELP

McDonalds, Allstate, Whole Foods, Taco Bell, Caterpillar, Abbott, Pure Storage, CHRISTUS Health, Love's, Comcast, Tumi, and others.

INKLING CONNECT

Easily connect all the tools you need to deliver a streamlined learning experience and extend the reach of learning.

“Inkling is a one-stop shop that allows us to meet the needs and pace of the business, which is really critical. My advice: implement platforms that make sense and support businesses getting faster and moving at this crazy pace. Inkling really does that.”

Michelle Kay

Director, Learning & Development
